4, Explain AUTO MDIX ?

MDIX - Medium Dependent Interface Crossover

Auto MDIX is a hardware feature on NIC that automatically detects straight through or crossover and internally swaps TX and RX signal.

5, Explain POE injector ?

POWER OVER ETHERNET injector is a adapter that adds electrical power to an Ethernet cable. It allows a single network cable to carry both data and electricity to a device like Router, ~~switch~~ Access points, IP phones.

6, Explain POE switch ?

POE SWITCH is a network switch that has built in POE Capability. While POE injector adds power to just one cable, POE Switch ~~can~~ can send both data and power through multiple ports simultaneously to all connected devices.

7, Explain types of nic & function ?

Types of NIC

1. ETHERNET NIC (RJ45 Ethernet cable)
2. Wireless NIC (Wi-Fi signal)
3. Fiber optic NIC

1. ETHERNET NIC - Converts binary data (and) into electrical signals to opponent device
2. Wireless NIC - Converts binary data from Computer's sending data to Radio signal to other devices
3. Fiber optic NIC - Converts binary data into light pulses to send them over a fiber optic cable to another device.

1, Types of mediums ?

Radio Frequency (wireless)
Electrical Signal (copper cable)
Light Signal (Fibre cable)

2, Write down switch 8-pins ?

- 1 +R
- 2 -R
- 3 +T
- 4 +V
- 5 -V
- 6 -T
- 7 X
- 8 R

3, Connect utp cable between two devices
